Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 26, 2009 has been entered.

Allowable Subject Matter

Claims 1-11, 13-23 and 27-28 are allowable. For the purposes of allowance the original numbering of the claims has been changed. Claims 8-11 and 21-23, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement among inventions I, II and III, as set forth in the Office action mailed on January 31, 2008, is hereby withdrawn** and claims 8-11 and 21-23 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is

withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The general concept of reducing noise in a main input microphone signal by generating a noise reference channel with a noise reference microphone such that the noise is subtracted from the main input signal was known in the art at the time of the invention as evidenced by Ikeda (US 6,285,768 B1). However, the Examiner has not found prior art that teaches or suggests the modification of Ikeda in order to provide a system that orients a direction of minimum sensitivity of the reference microphone towards the target source of the main input signal such that the received signal to noise ratio between the two channels is compared to a predetermined value, wherein an adaptive filter section filters the main signal when the ratio is larger than the predetermined value in order to remove the target signal from the noise reference signal through a subtraction section as defined in the independent claims 1, 14 and 27. Other prior art has been cited herein regarding directional microphones and noise suppression circuits, however the other prior art of record also fails to teach or provide suggestion to arrive the combination of the elements and steps presented in the independent claims, again when said elements or steps are collectively considered in regards to each claim. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JASON R. KURR whose telephone number is (571)272-0552. The examiner can normally be reached on M-F 10:00am to 6:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vivian Chin can be reached on (571) 273-7848. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
